Dear Resort Friends,

Twenty one years completed and we are still going strong. I asked you in last years newsletter and I am asking again, please take your boats and trailers to a car wash and power wash everything to help slow down and even stop the spread of exotic species. Our lakes are clean and we want to keep them that way.

Getting ready for our 22nd resort season is underway. We have added two Neptune coin –op washing machines along with a new dryer all in the game room. Several of our docks will be receiving new decking, a few new picnic tables, TV replacement will continue, and more cabins will be repainted. I can't list everything that we will do but it always involves a lot of general repair.

For several years now many of you have been asking for resort shirts and hats. Well our business major (Samantha) has been working on this and we will have merchandise this season. Watch our Facebook site for more info.

We are doing well as we hope all of you are as well, Samantha has completed her first semester on campus at Bemidji State University where she is a Junior already. Thomas is 6'5", 185 pounds and is enjoying his sophomore year having played Football this fall , Basketball right now and once again Golf this spring.

As all of you know fire destroyed Compeneros and Dorset House in Dorset and we were without the iconic eateries last season. Now a former student of mine and his wife have undertaken the task of rebuilding the restaurants and that process is well underway. The Main building that will house both restaurants is up , shingled, windows and doors are in . They plan on being open in May and I would say they are on schedule and being weather tight at this point should stay on schedule. The other good news with this is that Rick and Laura the previous owners will be working with Levi and his wife for at least five years to assure the icons revival, very good news for the Dorset Area.

Happy New Year –Bryan , Heidi, Samantha and Thomas

***We encourage payment via cash or check this season to save all of us \$**
